

# Community Contributed Proposal

**Full name** - CHRISTOPHER WILKINSON

**Organization** - Personal capacity

**Country or Region** - EU

**Sector** - Civil Society

**Topic** - Internet Governance; NMI, IGF

## Description

It is not clear whether NMI is designed to implement President Toomas Ilves' panel report or to organise funding for the IGF.

Regarding the former, please see my comments at the time at:

<http://christopherwilkinson.eu/?getfile=80>

Regarding the latter, NMI is not alone in this endeavor. Should members of WEF/Davos be willing to 'crowd-source' the IGF then let them do so.

It is not then necessary to link urgent and imminent funding of IGF to a complex and untested global IG mechanism. Particularly as the latter would require a broader and more democratic stakeholder basis than that currently proposed by NMI.

CW

**Funding needs/proposal** None
