

Gobierno de Costa Rica
Ministerio de Ciencia, Tecnología y Telecomunicaciones
Despacho del Ministro

San José, February 2nd, 2015
MICITT-DM-OF-043-2015

NET mundial Initiative Secretariat

Dear all,

The Ministry of Science, Technology and Telecommunications (MICITT) is the governing body of the National Innovation System and the promoter of Science, Technology and Telecommunications in Costa Rica. It is part of our mandate to promote an open, multistakeholder vision of Internet governance towards global wellbeing.

We firmly adhere to the belief that global participation is key to the spirit of NETmundial towards a roadmap for internet governance and further construction of adequate policies in the international context. Our Ministry is committed to actively engage and foster tools, capacities and synergies between technical, civil and academic communities, as well as in private and public spaces.

On behalf of MICITT, I state hereby our strong interest to host the 2015 Council Meeting of Net Mundial. I am fully aware that the signature of this letter implies our best efforts, resources, commitment and willingness to host top Internet leaders and high level conversations that will contribute to the future of technology.

I appreciate your response in this matter. It is our expectation that this meeting will be of benefit for Costa Rica as well as for the other members of Net Mundial. I wish to remark our permanent commitment to advance towards an open Internet governance model in the region.

With deep thanks and appreciation,

Gisella Kopper
Minister
